

## COLLECTOR WITH CONDENSATE DRAIN (INNOVATIVE PRODUCT)

Ord.n. Product

0660 SBK 100

The collector with condensate drain is advisable to use as part of the pipe V 104 which formed condensate is:

- a) captured inside the collector and then there will be a gradual evaporation of condensate
- b) drains away through tubing DN 32 into the drain outlet. We can use to route more of these collectors of condensate, if conditions of a ventilation system require it.
